

Internship Programs

Internship opportunities are available in all colleges. Internship is designed to provide eligible students with practical work experience in their chosen field of study while earning academic credit. For details regarding specific program options and eligibility requirements including GPA, please refer to the current catalog for the appropriate campus. Students are also encouraged to contact Experiential Education & Career Services (EE&CS) for more details. For locations, hours and contact information, please consult the JWU Directory.

Students are able to register up to one year in advance of their internship semester and are urged to contact EE&CS early to register and secure their internship in their chosen semester. For more information, visit Internships.

Graduate students need to meet with EE&CS prior to registering for internship. These students must have their internships approved by the graduate department chair. Once approved, EE&CS will register the student for internship.

Internships for International Students

Due to immigration regulations, international students are only permitted to participate in an internship (curricular practical training) if it is included in their curriculum program. All internships are subject to an approval process through EE&CS and the International Student Services Office. International students must submit all paperwork to EE&CS at least two weeks before the end of the previous semester to allow enough time to process the internship request. Failure to do so will result in the internship not being approved.

Note: International students who work on campus must consult with Student Employment and the International Student Services Office to determine if they can continue to work while completing an internship.
