

# Grade Reports

A student must be officially registered in a course for a final grade to be issued. Students are notified via their JWU email account when final grades are available in jwuLink (generally by the Thursday after final exam week). While grades may appear in ulearn or on the degree audit, they are not yet official and grade point averages (GPAs), academic standing and course repeats may not yet be processed. Grades are considered official and final only when listed on the academic transcript.

Students who believe that a grade was reported incorrectly, after final grades are issued, should consult with the instructor of the course. More information can be found in Grade Appeals.

The university does not mail grade reports.
