Cannabis Management - MINOR

The Cannabis Management minor equips students with the knowledge and skills demanded by the rapidly growing legal cannabis industry. By integrating key fields such as science, business and entrepreneurship, students are prepared to manage operations for both startups and established businesses. The minor covers essential industry competencies, including regulatory compliance, cultivation and horticulture, product development, marketing and branding, business management, and customer service. Students gain knowledge of the cannabis industry, from cultivation practices to product development and end-user services, while learning how to strategically market and segment products in a highly regulated market.
