

Corporate Accounting and Financial Analysis - B.S.

The Corporate Accounting and Financial Analysis bachelor's degree program consists of required accounting and finance courses, as well as related business subjects and general studies. Students select courses from a variety of accounting and/or finance courses to customize and enhance their educational experience. The program provides a solid foundation in managerial accounting, as well as financial accounting and finance.

Graduates are prepared for entry-level positions in auditing, accounting, banking, finance and other management accounting specialties. The program is also designed to prepare students for the Certified Management Accountant (CMA) certification, which requires the completion of independent tests in the areas of accounting and finance. Students completing this degree program have the opportunity to sit for and pass the exam portions of the CMA certification prior to graduation. In addition, the program offers interested students the ability to work toward their Certified Public Accountant (CPA) certification.

Upon completion of the program, graduates are expected to:

- Apply the major concepts, characteristics, elements, principles, skills and values in the corporate accounting and financial analysis field.
- Communicate effectively to diverse audiences as required in the fields of corporate accounting and financial analysis.
- Use decision-support tools to resolve contemporary business issues using ethical business practices.
- Analyze and interpret business transactions for financial and non-financial impact.

Students have the opportunity to participate in an accounting or finance internship as part of their free electives. Students are also encouraged to join and be active members of the Institute of Management Accountants (IMA). As members, students are encouraged to attend and participate in meetings, as well as network with industry executives. Student members may also participate in student competitions, attend regional conferences and compete for scholarships. Students are also encouraged to obtain professionally focused experience by participating in the Internal Revenue Service's Volunteer Income Tax Assistance (VITA) program.

Corporate Accounting and Financial Analysis

A four-year program leading to the bachelor of science degree

Business Foundations		
ACCT1210	Financial Accounting	3
