## Marketing \& Advertising - B.S.

The Marketing \& Advertising bachelor's degree program prepares students for careers in a variety of managerial and professional positions in the marketing and advertising industry. Students learn general brand marketing concepts and various functional specialties in fields such as advertising campaigns, digital marketing, market research and creative strategy. As part of the program, students are offered the opportunity to develop expertise in content creation, marketing analytics, consumer behavior, integrated marketing communications, brand marketing, professional selling, international marketing, and marketing technologies such as data-driven marketing, digital media planning and search engine marketing.

Upon completion of the program, graduates are expected to:

- Apply the major concepts, skills and values of marketing and advertising in business situations.
- Communicate effectively to diverse audiences, purposes and situations through a variety of professional methods required in the marketing industry.
- Use decision-support tools to resolve contemporary business issues using ethical business practices.
- Analyze research and use critical thinking to identify and recommend appropriate solutions for client/brand marketing challenges.
- Develop branding and marketing strategies that are ethically sound and align with business objectives for local, national and global brands.

Students have the opportunity to hone these skills while participating in a semester-long internship experience at a university-approved internship site. Students may also apply these skills in programs such as directed experiential education or study abroad. These programs are tailored based on student learning, interests, and professional goals. Additionally, students may choose to use an additional six credits from their free electives based on advising and pre-planning.
