

Supply Chain Management - MINOR

Supply Chain Management unites producers and sellers to collaborate and streamline the flow of goods and services, enabling businesses to thrive while meeting customer demands for efficiency and responsiveness. This minor, offered as a hybrid program, equips students with the tools and techniques to manage materials, information and finances within their primary field of study, alongside essential skills in business operations, continuity and process improvement. Graduates are well-prepared for entry- and mid-level positions, as well as advanced coursework in operations, supply chain and logistics.

Supply Chain Management

Minor

MGMT2030	Operations and Supply Chain Management I	3
MGMT3035	Operations and Supply Chain Management II	3
