

Foundational Operations & Supply Chain Management - Micro-Certificate

Curriculum

This undergraduate-level micro-certificate program is designed to prepare students for entry-level work within the operations and supply chain management field and/or an opportunity to enhance one's current position in a broad range of industries. Students learn the basics of operations and supply chain management, including the supply chain model, product, process and project design and management, inventory control and management, global logistics, and sustainability and risk management.

NOTE: Students who enroll in this micro-certificate program are ineligible for financial aid. Contact Student Financial Services for options.
